| <b>\$250</b> | <b>\$210</b> | <b>\$45</b>           |

Nicotinamide adenine dinucleotide (NAD) is a coenzyme essential for metabolism, supporting brain function, reducing inflammation, boosting energy, and promoting healthy aging. It also has cardioprotective effects and potential benefits for memory-related diseases.

We recommend starting NAD+ treatments at 200 mg and gradually increasing to 750 mg (anti-aging) or 1000 mg (neuro-regeneration). Once the target dosage is reached, continue with one monthly treatment. Initial 200 mg doses take about 90 minutes, and some may experience hot flashes or chest tightness.

**\*Members receive a complimentary HBOT session with NAD+ doses over 500 mg to enhance effectiveness.**

**Key Ingredients: Nicotinamide adenine dinucleotide**
